

CALL FOR PAPERS

Digital Engineering

Processes and Tools for Developing the Products of Tomorrow

Process Insights Europe 2022 focuses on Processes for Future Product Development, provides best practices to prepare the engineering world for mastering the challenges of tomorrow and shows how efficient processes simplify and accelerate the necessary changes.

Representatives of renowned companies will give cross-industry and practice-oriented presentations on the most recent developments in process management where agile transformation, functional safety, hybrid development methods, and cross-functional digital process management play an essential role. By the industry for the industry: speakers will additionally present best practices for the tool-supported management of engineering processes.

Digital engineering is key for the product development processes of tomorrow. Share your experience in modern process management with the experts of Process Insights Europe.

We invite you to present a paper, drive a round table discussion, or exhibit your Best Practices at Process Insights Europe 2022.

Share your expertise & shape Process Insights Europe 2022!

PROCESSES FOR TOMORROW

- Process Management 4.0
- Process Models
- Product Development Processes
- Product Engineering Processes
- Process Architecture
- Standard Compliance
- Process Metrics and KPIs
- Maturity Models
- Process Monitoring
- End-to-End Processes
- Process Improvement & Optimization
- Enterprise Process Management

STAGES | BEST PRACTICES

- Case Studies
- Modeling Guidelines
- Process Tailoring
- Process Review & Approval
- Process Change Management
- Role-Based Trainings
- Tool Integration
- Compliance Management
- Process Management Strategies
- Process Management Organizations
- Implementing Automotive SPICE®
- Implementing ISO Standards

ORGANIZATIONAL CHANGE

- Corporate Culture
- Future of Work
- (Large-Scale) Agile Transformation
- Agile Collaboration in Mixed Environments
- Organizational Development
- Organizational and Operational Structures
- Change Management
- Reliability Management
- Cross Company Collaboration

PROCESSES & TECH TRENDS

- Digitalization
- Internet of Things
- Artificial Intelligence
- Machine Learning
- Blockchain
- Industry Best Practices
- Automotive SPICE®
- DevOps/DevSecOps
- Technical Compliance
- Value Stream Management

SAFETY & SECURITY

- ISO26262
- Cyber Security
- ISO/SAE 21434
- SOTIF & ISO/PAS 21448
- Functional Safety Assessments
- FTA/FMEA/FMEDA
- Tool Qualification
- Safety Analysis
- Safety and Security Lifecycles

TOOLS

- Next Generation ALM & PLM
- Program & Project Management
- Product Line Engineering
- Variant Management
- Tool Integration

We are looking forward to your contribution <https://process-insights.org/call-for-papers-2/>

SUBMISSION DEADLINE | 3/31/2022

Process Insights Europe | June 22-23, 2022 | VIP-Lounge SPVGG GREUTHER FÜRTH
